SUBJECT Blast Furnaces of Petrovski Plant in
Dnepropetrovsk 25X1C

NO. OF PAGES 1

NO. OF ENCLS.
(LISTED BELOW)

SUPPLEMENT TO
REPORT NO.

25X1X

1. Location:

The blast furnace installations are part of the Petrovski
Dnepropetrovsk (34°59' E/48°27' N), Ukrainian
Dniepropetrovsk rolling mill and south of the
plant.

from Soviet laborers that the plant
were installed in 1928. Two furnaces
the war, and only two were in operation
observation. Each was equipped with
broken pieces of the two destroyed furnaces
and of eight air heaters lay scattered around an area of
120x60 meters. Day and night shifts were at work during
the time of observation clearing the ruins away and break-
ing ground for the foundations of eight new air heaters.
The new excavations for the foundations of the air heaters
extended 6 meters below the level of the destroyed air hea-
ters, which were 6 meters in diameter. The new foundations
have a diameter of 8 meters. The foundations for the new
blast furnaces were not completed. The destroyed furnaces
were formerly installed in one line, and source assumes that
the new furnaces will be set up in the same manner.
